Subject: Congratulations: Jef, Feifei, George, and John!

Folks,

Please join me in congratulating Jef Considine, Feifei Li, George Kollios, and John Byers for having secured the best paper award in the upcoming IEEE ICDE conference, one of the top three conferences in Databases. This award, which they will share with a CMU paper, is for their elegant results in a paper entitled "Approximate Aggregation Techniques for Sensor Databases".

Congrats and way to go!
