

BU CAS CS 320 (FALL SEMESTER, 2006)
CONCEPTS OF PROGRAMMING LANGUAGES

Guidelines for Homework Submission

- **Hardcopy submission** For each assignment, you are required to submit hardcopy including the following items:
 1. Your name
 2. Your BUCS user id
 3. Your BUID
 4. The answers to the paper/pencil questions (or the name of the file that contains these answers)
 5. The name of your g-submit directory (e.g., kerry/hw1, bush/hw2)
- **G-submission** For each assignment, you are required to g-submit your code for all programming questions. Please create a directory with the name “hw#” to store all your code, where “#” is the assignment number.

Together with your code, you should also g-submit a *README* file in which you list all the programs you submit and give the following information on each of your program:

1. Does the program compile correctly?
2. How should the program be tested?
3. Any other clarifying comments if necessary.

Thanks for your cooperation.
