BU CAS CS 520: Principles of Programming Languages

(Syllabus)

- **Semester**: Spring 2015
- **Instructor**: Hongwei Xi
- **Lecture Times**: Mon/Wed 1:00-2:30PM
- **Office Hours**: Wed: 4:00-5; Thu: 1-3; by appointment
- **Classroom**: PSY B39
- **Reference Books**:
  - *Practical Foundations for Programming Languages (draft)* by Robert Harper
  - *Introduction to Programming in ATS* by Hongwei Xi
- **Homepage**: http://www.cs.bu.edu/~hwxi/academic/courses/Spring15/CS520.html
- **Overview**:

  *Principles of Programming Languages* is a course that introduces students to some fundamental principles and techniques in modern programming language design and implementation. The course mainly covers type theories in programming and emphasizes the need for mathematical formalism in both describing and analyzing programming languages and programs.

- **Class Schedule** Please find on the class homepage a detailed class schedule by each week.
- **Grades** The final score is calculated using the following formula.

  \[
  \text{final score} = 40\% \cdot (\text{homework}) + 20\% \cdot (\text{midterm}) + 30\% \cdot (\text{final}) + 10\% \cdot (\text{participation})
  \]

  The final letter grade is calculated as follows.
  - **A**: final score is 80% or above (A, A-)
  - **B**: final score is 70% or above (B+, B, B-)
  - **C**: final score is 60% or above (C+, C, C-)
  - **D**: final score is 50% or above (D)

- **Academic Integrity**: We adhere strictly to the standard BU guidelines for academic integrity. For this course, it is perfectly acceptable for you to discuss the general concepts and principles behind an assignment with other students. However, it is not proper, without prior authorization of the instructor, to arrive at collective solutions. In such a case, each student is expected to develop, write up and hand in an individual solution and, in doing so, gain a sufficient understanding of the problem so as to be able to explain it adequately to the instructor. Under **no** circumstances should a student copy, partly or wholely, the completed solution of another student.
