

BU CAS CS 525

Homework Submission Guidelines

- **Hardcopy submission** For each assignment, you are required to submit a hardcopy including the following items:
 1. Your name
 2. Your BU ID
 3. Your login name on CSA.BU.EDU
 4. Answers to paper/pencil questions
 5. The name of your g-submit directory
- **G-submission** For each assignment, you are required to submit the programs for all questions that require coding. Please organize your g-submit directory by creating a separate directory for each assignment and name it “hw#”, where # is the assignment number. Together with the programs, you are also required to submit a README file in which you should list all the programs that you submit and give the following information for each of them (if applicable) :
 1. Does the program compile successfully?
 2. Have the program passed the given tests?
 3. How should the program be run and tested?
 4. Any other comments that deem to be relevant.

Please note that

- A submission for an assignment is considered incomplete if no hardcopy for the assignment is submitted by the due date
- A (possibly significant) number of credits may be deducted automatically if no informative README file is included in a submission.
